SUMMARY

Full stack developer in training, coding since 2024. I build complete web applications from database to front end, with projects in PHP (framework-free MVC), Laravel, React, Next.js and NestJS. I ship applications to production (Render, Vercel), write automated tests with CI, and contribute to a collaborative monorepo using a branch and pull request workflow. Seeking my first internship or junior developer role.

TECHNICAL SKILLS

Front end	JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS, CSS Modules
Back end	PHP (MVC), Laravel, Node.js, NestJS, REST APIs, authentication (sessions and JWT)
Databases	MySQL, PostgreSQL, Supabase, Prisma, Eloquent, PDO
Testing and CI	Vitest, Testing Library, Playwright, GitHub Actions
Tools	Git, GitHub (PRs, Conventional Commits), Docker, Render, Vercel

PROJECTS

CPM Conecta - Harassment Reporting Module

React, TypeScript, NestJS, Prisma, PostgreSQL, Docker | Collaborative project (monorepo)

- Built the confidential reporting module end to end (front end, API and database) for the CPM Conecta school system, part of the "Vozes que Protegem" initiative.
- Implemented a multi-step report flow with protocol number, file attachments (Multer) and a case-tracking dashboard for school counselors and administration.
- Integrated the module into an existing codebase using feature branches and pull requests reviewed by the lead developer.

Barbershop Management System

PHP (framework-free MVC), MySQL/PDO, JavaScript | barb-system.rf.gd

- Built a web booking system with client, barber and admin roles, custom routing and session-based authentication.
- Designed a 9-table database, including a many-to-many relation between barbers and services, business hours and appointment change history.
- Implemented a client-facing appointment history timeline and dark mode.

SkillFlow - Learning Tracker Platform

Laravel, React, Inertia.js, Tailwind, PostgreSQL (Supabase), Docker | skillflow-8ixd.onrender.com

- Built a platform to organize learning tracks, topics, notes and resources, with progress tracking and timed study sessions.
- Created a dashboard with metrics (time studied, weekly chart, day streak) and topic dependencies with cycle validation.
- Deployed to production on Render with a multi-stage Dockerfile, migrating the database from MySQL to PostgreSQL.

Personal Portfolio

Next.js 16, TypeScript, CSS Modules, Vitest, Playwright, GitHub Actions | portifolio-theta-eight-99.vercel.app

- Built a bilingual site (pt/en) with browser language detection, light/dark theme and accessibility features (keyboard navigation, reduced motion).
- Integrated the GitHub API with caching and revalidation (ISR), showing live repositories and languages.
- Wrote 59 unit tests and 29 E2E tests across desktop and mobile, running in CI on every pull request.

EDUCATION

Technical Degree in Web Development (Informática para Internet)

Colégio da Polícia Militar da Paraíba (CPM-PMPB), Brazil | Expected graduation: 2026

LANGUAGES

Portuguese - native | English - basic
